

# True State of the Global Swine Fever Epidemic: The Reality

April 20, 2019

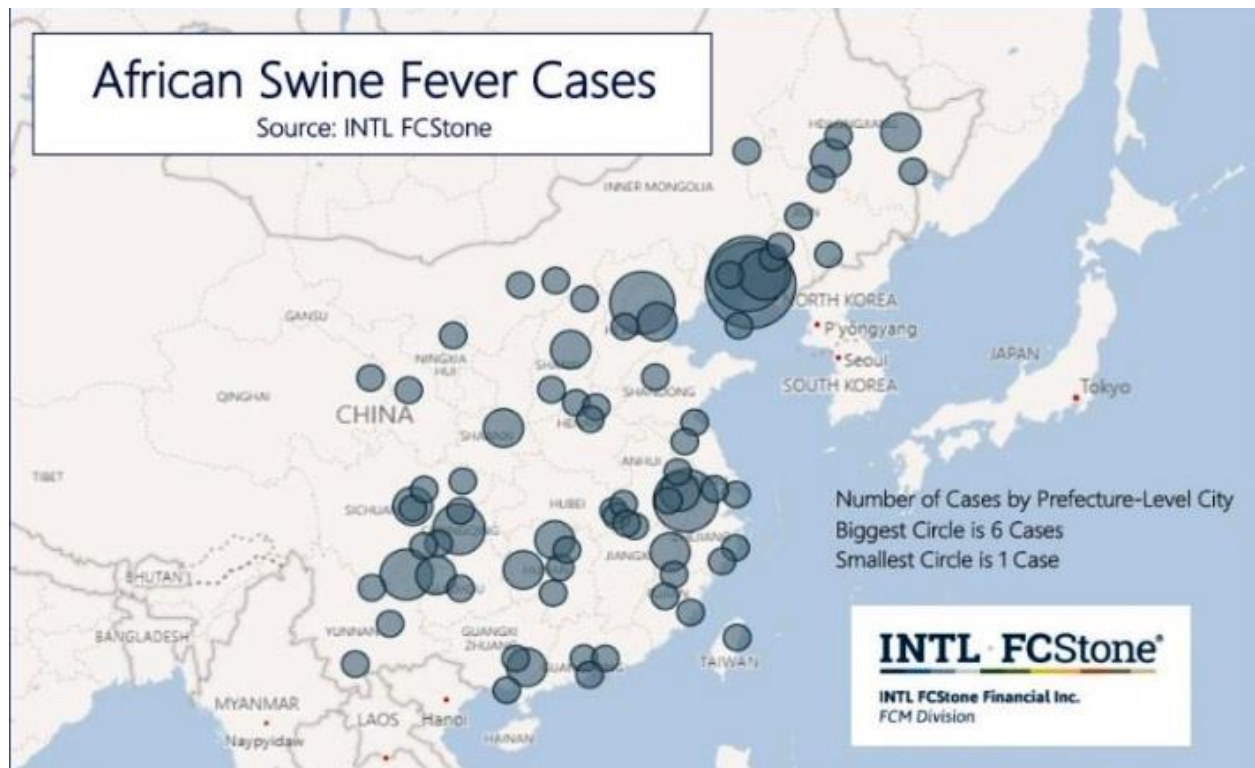

Good Afternoon Everyone,

The information I will present in this update is frightening for two reasons, first the speed at which this swine fever is spreading and the 100% mortality rate is astonishing. Secondly it's as if the virus is allowed to spread to reduce pork consumption and demand across China as well reduce the need to import vast amounts of soy to keep the entire industry going. Through history China has collapsed during Grand Solar Minimums, and in the back of my mind the Chinese government is getting people ready for leaner times through the reduction of available pork.

**WARNING:** The image and links to the true situation in China may be offensive, if dead and dying animal images effect you, stop now, and understand pork will become unavailable across the global by the end of the year if things continue the way they are.

The map above shows how intense the outbreaks are within China and the map below show the spread to Taiwan and Vietnam. For sure other countries in Asia are being affected as reports are surfacing of out breaks in Japan.

## VIETNAM INSIDER

### African swine fever spreads to 19 cities of Vietnam

March 25, 2019

African swine fever has so far hit 19 cities and provinces of Vietnam, leading to the culling of nearly 34,800 pigs, according to the Vietnam's Department of Animal Health on Friday.

This only a fraction of the 200 million animals China has culled in April alone. Now the virus has spread to Vietnam and Thailand. Disposal is a huge problem as well as fuel that burns hot enough to kill the virus so they are resorting to tires as fuel to keep the burn going. Below are more images, rivers of pigs, dump truck after dump truck dumping pigs in mass burial areas.

The links I give you are disturbing the treatment of the animals and the conditions that you see will possibly bring you to tears if not anger. REMEMBER the people who filmed these events risked their lives to smuggle the footage out. By sharing the images and videos if caught breaks the China State Secrets Laws which results in arrest, interrogation and hard labor for a minimum of 10 years or a death sentence for what you see in these videos.

WARNING: THIS PLAYLIST WILL BE DISTRUBING IF YOU HAVE ANY FEELINGS OR SYMPATHY TOWARD LIVING ANIMALS. These are banned in China.

恐怖震撼！非洲猪瘟掩埋上万头猪现场！

As well the virus is killing animals so fast that they are dying where they walk with such lethality that animals litter the streets in the countryside areas. They can't decontaminate or remove the carcasses faster than the animals are dying.

Zero Hedge

**Food Crisis 2019: African Swine Fever Outbreak  
Devastates Global Pig Population, Pork Prices  
Skyrocket**

All over the world, anything with pork in it is going  
to start costing a lot more...

In conclusion, my firm opinion of how governments are covering the damage of the virus, how fast it is spreading and the possibility that every country on Earth will be effected within 12 months is being understated.

There is a concerted effort for China to hide the real state of the virus, and for good reason, this scares me, it should scare you too. Reports are now emerging that is has jumped to foul, namely chickens in the same areas, but I have not seen any images or videos only reports from the same spotters who took the pig culling videos.

Good luck in your preparations and I leave you with the question, what will countries do in terms of imports or exports as this virus sweeps the planet?
