

Empty Shelves Across the Planet, but Why?

Grand Solar Minimum channel recently tweeted, “If last year's crop was bad...imagine what will this year's impact next year.” This must be a concern for everyone because the 2018 crop was a lot better compared to the current crop output; but is still creating these types of food price rises and food shortages, scarcity, if you will. Can you imagine what will happen next year?

Grand Solar Minimum @GrandSolarMin · 19h

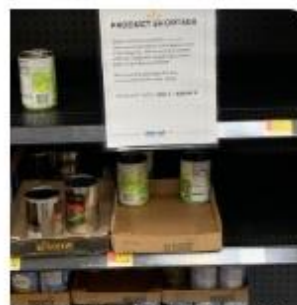

If last year's crop was bad... imagine this years impact next year...

#GrandSolarMinimum @Jakegsm @dbirch214 @adapt2030 @IceAgeFarmer @Piers_Corbyn @TheWatchers_ @CharlesScottGSM @RadiantCreator Here is what Del Monte had to say about the empty shelves:

We're aware that some retail stores may currently be out of Del Monte Foods, and apologize for any inconvenience or disappointment. Our fruits, vegetables, and tomatoes are packed at the peak of ripeness, and the growing seasons and crop yield may vary each year.

Occasionally, as in this situation, the previous year's crop may not meet 100% of consumer demand. As a result, consumers may find that the product is out-of-stock for several weeks. This is a temporary situation, and we expect to return to normal supply levels by mid-to late August.

Thanks again for contacting us. If we can be

Another group I'm in (Kroger co-sponsoring group to be specific) posted this 🙄

Look at this notice from store's management: "Due to the poor harvest season, we are experiencing shortages" This means producers were using carryover stocks from last year's harvest to produce those canned goods, because there is no harvest coming in as of mid-summer, the plants are not yet matured. We are at the lowest in terms of planting since 1938 in the United States; and China lost 30% of its corn already as well. Thus, next year, there will definitely be thinning of the shelves.

👍😞 3

Additionally, global supply chains are dangerously easy to snap, and that is an understatement. Everything is very dependent on the easy flow of credit. So, if there is a credit lock-up like the once experienced in 2008 and 2009, global supply chains will contract once again.

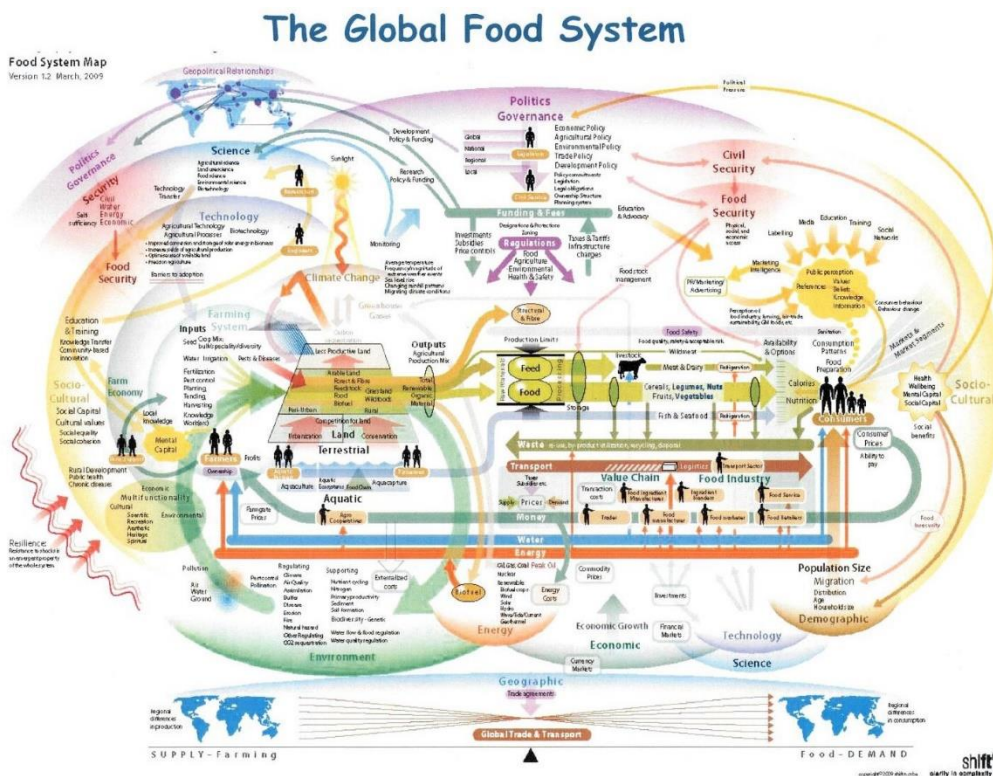

Global Supply Chains Are Dangerously Easy to Snap

The U.K. is preparing for empty shelves in case of a no-deal Brexit, but others may be just as vulnerable.

foreignpolicy.com

Case in point, look at The Global Food Supply System, these interconnections of major industries running the food economy, as shown in the chart below. Now, imagine if our economy drops 25 or 30% due to incredibly bad harvests or doubling food prices. What will happen in The Global Food System? What piece will lockup first? What is the trickle-down effect? Where will be the next lockup? Where will the non-delivery be at the end of that chain? Because this is where the danger lies in such a fine-tuned food supply chain.

In this, DC CLOTHESLINE article, “bare store shelves” caught my attention. This was on February 6th, and has been an ongoing event since that time, and just to clarify, I have purposely not chosen store shelves from hurricane areas because every time a hurricane strikes, some shelves are going to be emptied. This store, with empty shelves is in a place completely devoid of any natural disaster. So why are we seeing so many bare shelves, like this, across grocery stores, globally?

DC CLOTHESLINE

Why Are We Seeing So Many Bare Shelves at Grocery Stores Across the Country?

February 6, 2019 Samantha Biggers News 0

I said ‘globally’, because Kenya headlines, “Empty Shelves Depict a Bleak Future for Choppies Supermarket.”

KAHAWA TUNGU

Empty Shelves Depict A Bleak Future For Choppies Supermarket, 3 Years After Take Off

Business news media in Kenya are trying to allay panic among their citizens, insisting that it is not really a shortage, but just a monetary issue. Accordingly, this will get straightened out eventually, and more resources will be devoted to the operation.

Citizen TV Kenya @citizentvkenya · Jul 8

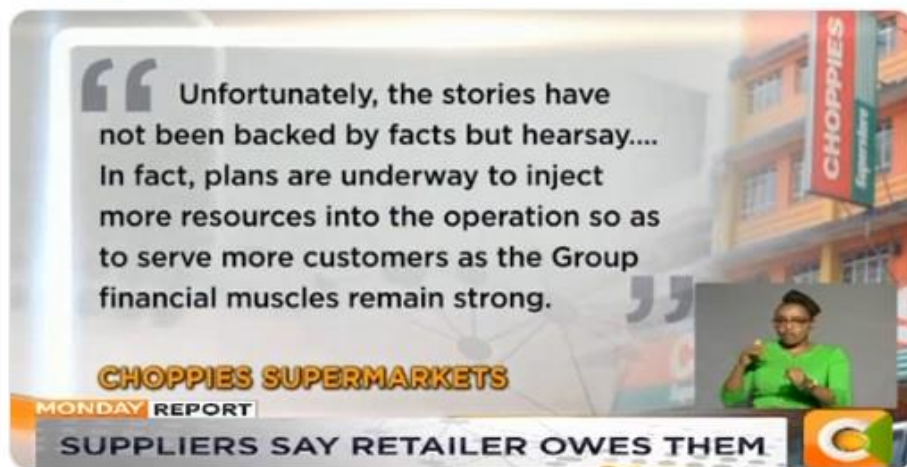

Struggling Choppies: Retailer insist it is in good health. Spot check reveals **empty shelves**. Staff indicate salaries delay

Suppliers say retailer owes them

#MondayReport

@TrevorOmbija

@WaihigaMwaura

Then, there are these product shortages. This notice is from Walmart management: “Due to limited availability, we are experiencing product shortages across this category. We’re working with our suppliers to get these items back as quickly as possible.” Well, like I said, you cannot print food, like you can print money. Let us hope that next year, this Grand Solar Minimum does not intensify.

Ontario is also experiencing this empty store shelves scenario. LCBO, a liquor & beverages shop, is again blaming the new warehouse management system for the shortages. So, anything that involves grains to distill spirits showing some duress.

I can finally understand why the US government is rationing ethanol production before the corn shortages set in.

Tina Yazdani @TinaYazdani · Jul 9

NEW: Have you noticed **empty shelves** like this at LCBO stores? @CityNews has learned deliveries are weeks behind schedule as the LCBO transitions to a new Warehouse Management System, leaving stores across the province with a massive supply shortage. More to come.

The notice reads: “Please see one of our customer care service representatives for alternative recommendations.” If I were the customer service representative, I would say, “Go and buy a lot of stuff for a long-term food storage, because next year is going to be worse than this year.”

Brad Franklin @Franklin_Brad · Jul 12

The @LCBO has become a complete joke. Ontario consumers deserve better service. Time to open up the market. @OPSEU @fordnation @OntarioPCParty #emptyselves

Walmart in Central Ohio is also running out of flour, bread, and other wheat-based products. Instant noodles, different kinds of boxed items, instant potatoes, pastas, etc. are also dwindling.

Then in Target, this is how the shelves look like. This type of empty shelf scenario was seen in May as well.

VireoDawn @vireodawn · 19h

At my local Walmart in central Ohio. Any wheat products were low.

Replying to @dearkrysta

it's easy when your @Target has **empty shelves** every week. #WhatisupwithTarget

This is a progression. I wrote an article about this in February, when we had the same in May, June, and July, and like Rut said, this is caused by pollinators being affected by different chemicals in our environment. It is truly an extinction-level event, when we lose these pollinators. Nature is taking away our crops, and we cannot pollinate by hand fast enough to feed the planet.

Rut Erdelyi @RutErdelyi · May 23

Compliments to @Tesco in #Slovakia which opened their **store** with **empty shelves** to spotlight a world without #pollinators 🐝 #IDB2019 #Food #Health #Survival #ClimateAction #CSR #StrongerTogether refresher.sk/65829-Slovensk...

The U.K that has not experienced a hurricane as of late but has empty shelves. Either way, this is an unacceptable event on a Monday.

It is just the supply chain, and *nothing* to worry about, so go back to work and pay your taxes, at least that is what 'they' say.

19bjac84 @19bjac841 · 22h

I am officially done with @asda on Maidstone road in Chatham!! Third week in a row on a Monday **empty shelves** and no trollies, either you have very lazy staff or not enough of them.... Either way it is unacceptable! 🤔🙄🤔 @AsdaServiceTeam

On a serious note, *Winnipeg Harvest* and other food banks feeding the homeless community are asking for your help because they are running out of food too.

They are in dire need of canned stew, canned beans, fish, peanut butter, and carbohydrates like pasta, rice, instant potatoes, mac and cheese, etc. Those are the same things that are unavailable, as discussed in this article so far. Do you think this is a coincidence?

Anyway, the trickle-down effect is going right to the bottom segment of the population, and as I have said since the beginning of this channel, it is going to take about 10-15% of people at the lower strata of economic earnings, in any country, to go to the streets to disrupt the entire country economically. When this happens, the police state will go into action, because governments will have to control those people.

FYI: There is not enough police or army to control 30-40 million people in the United States. They will have to use 5G as a crowd control device, to control all the unruly protesters due to food riots that will be coming to a city near you.

Winnipeg Harvest @WinnipegHarvest · 30 Apr 2018

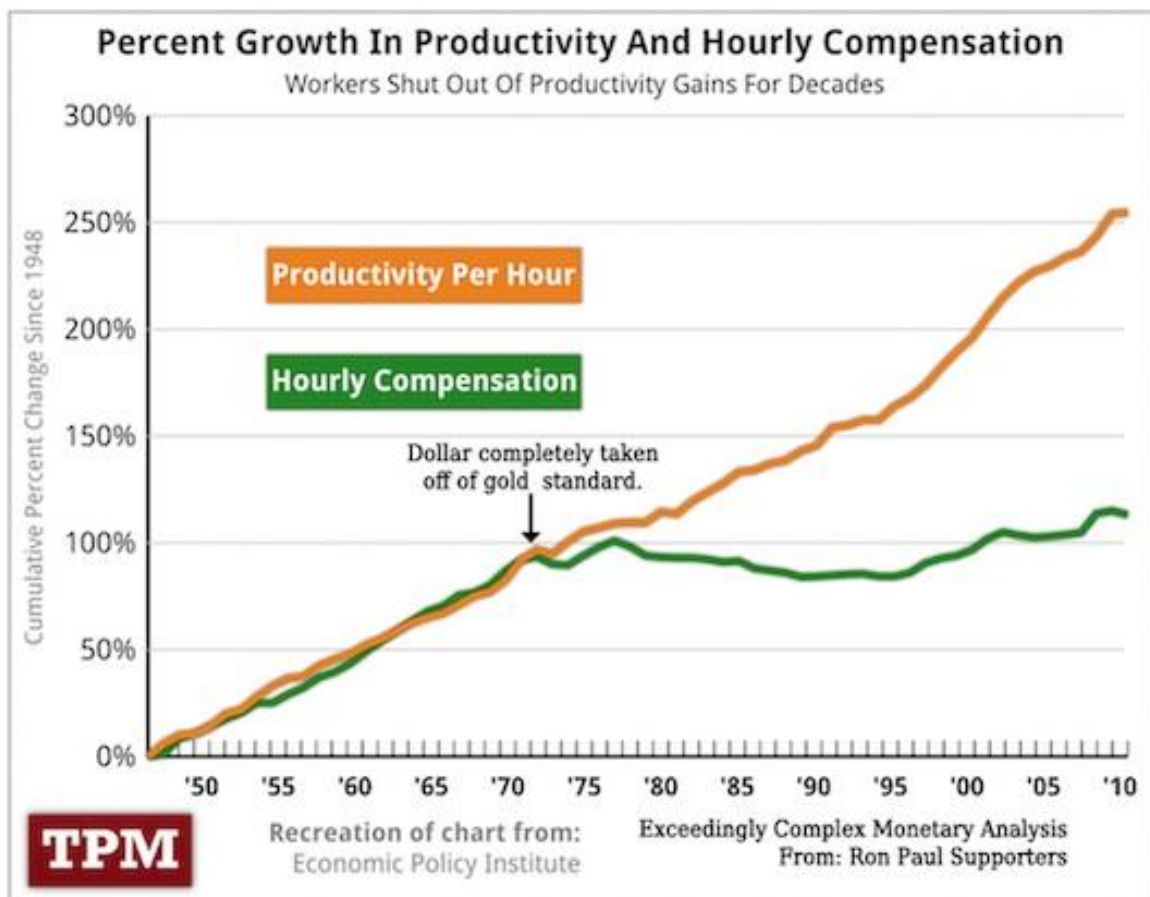

Winnipeg Harvest is facing a serious **shortage**. There has been a notable increase in the need for our most needed food items.

- Protein (**canned** stew, beans, and fish; peanut butter)
- Carbohydrates (pasta, rice, instant potatoes, mac and cheese)
- Canned** soup
- Canned vegetables/fruit**

Finally, a reality check, hourly compensation is depicted by the green line, while the productivity per hour is shown by the orange line. You are priced out of the market. Good Luck

Thanks for reading, I hope you got something out of the article. If you would like more content like this, I produce the tri-weekly Mini Ice Age Conversations podcast, 30 minutes of in-depth analysis on the GSM you can take on the go through out your day.

MIAC #213 Are we living in a feudal society with the illusion of progress?

<http://adapt2030.libsyn.com/miac-213...>

Climate Revolution is a 'must read' for the understanding of our Sun driven climate as we progress deeper into the new Eddy Grand Solar Minimum. Weather extremes leading to Global food scarcity and high food prices are here now, and this book describes the expected changes, how to survive & thrive during future challenging times with practical preparations.
